Right of Way Easements

SUBJECT:

Right of Way Easements.

POLICY:

Recorded right-of-way easements for the installation and maintenance of power lines are necessary to protect the Cooperative from financial loss in the event of the sale of land, or the relocation of highways and other public utilities which necessitate the relocation of LYREC lines.

All easements will be recorded with the Clerk & Recorder of the County in which the easement is located.

LYREC will secure signed easements from landowners before commencement of all overhead and underground electric lines and facilities.
